Objective

Seeking an entry level position as a Production Engineer

Summary of Qualifications

- Six years of coding experience
 - O Languages Java, C, C#, Swift, Python, JavaScript, TypeScript, HTML, Go
 - Software VSCode, GitHub, Slack, VMWare, VirtualBox, AWS, Firebase, Stripe, Docker, DigitalOcean
 - Operating Systems MacOS, Windows, ChromeOS, Ubuntu, Debian, Alpine, Pop!_OS, CentOS
- Experience in a team-based environment built through fellowship work, volunteer work, and hackathons.
- Effective communication skills developed through past work with organizations.

Education

The University of Texas at San Antonio

Bachelor of Science in Computer Science - *Cloud & Systems*

Spring 2022 President's List Spring 2019 & Spring 2021 Honor Roll

Relevant Coursework:

- **Data Structures**
- Computer Architecture
- **Database Systems**

- Parallel Programming
- **Embedded Systems**
- Data Science

Cloud Computing

Graduated: May 2023

June 2023 – September 2023

Advanced Systems Programming

Relevant Experience

Production Engineering Fellow, MLH Fellowship, Meta

Remote

- Completed 12-weeks of structured curriculum-based learning covering core Production Engineering topics, supplemented with events/workshops hosted by industry experts
- Created an open-source personal portfolio website template using Python, Flask, Jinja, MySQL, Nginx, and unittest
- Automated testing and deployment workflows using CI/CD
- Set up system and container monitoring, alerting, and visualization using Prometheus and Grafana

Open-Source Developer, MLH Fellowship, Amazon Web Services (AWS)

September 2022 – December 2022

- Remote
 - Worked with AWS Maintainers to contribute to the AWS Cloud Development Kit (CDK) repository.
 - Learned how to edit the CDK using Typescript and run Yarn tests before submitting pull requests.
 - Met with other Fellows and our pod leader multiple times a week to discuss our progress.
 - Peer programmed with another Fellow working on the CDK for a couple of pull requests.

Relevant Projects

Social Circle, MLH Fellowship Orientation Hackathon

September 2022

- Created a basic social media web application using React, Firebase, Bootstrap, and Netlify
- Used Firebase Auth to securely create users and manage logins and the Firestore database to store the board posts.
- Designed the front-end looks of the site using CSS and Bootstrap
- Remote hosted the site using Netlify at https://social-circle.netlify.app.

ANGER Applications Solitaire, Application Programming

Spring 2020

- Created a functioning solitaire application using Eclipse and JavaFx
- Implemented researched algorithms to have the cards behave according to the rules of Solitaire.
- Integrated systems for restarting the game with either the same deck or a new one, choosing card backs, & audio control.
- Went through multiple revisions to fix visual and gameplay bugs.

Activities

CodeQuantum Volunteer, UTSA

Rowdy Datathon Participant, UTSA

Rowdyhacks VII Technical Coordinator, UTSA

Rowdyhacks V Participant, UTSA

Member of Association of Computing Machinery, UTSA

Member of Japanese Student Association, UTSA

November 2022

October 2022 March 2022

March 2020

January 2019 - May 2023

August 2018 - May 2023
